

NANTASKET'S \$500,000 DREAM CITY

MAGNIFICENT PLEASURE RESORT TO OPEN IN SPRING ON SOUTH SHORE.

Over half a million dollars, possibly more, will be spent to create at Nantasket Point a great marine park, which, the promoters say, will surpass both Dreamland and Luna Park at Coney Island. This new park will be known as Dream City. It will be open to the public not later than June 15, and there will be added to the train of pleasure boats from Boston to Nantasket Point two steamers immediately.

HOW DREAM CITY WILL LOOK AT NANTASKET

Mr. Graham, who prepared the plans for the new resort, has been very successful in securing the necessary funds. He has secured the services of the architect, Mr. J. H. Thompson, who has designed the building to be a masterpiece of modern architecture. The building will be a great pleasure resort, with a large hotel, a casino, a theatre, and a variety of other amusements. The grounds will be landscaped with lawns, gardens, and a large artificial lake. The resort will be a great attraction for the summer season, and will provide a place of recreation for the people of Boston and the surrounding area.

W. F. Hamilton Manager.
Mr. Hamilton, who built Luna Park, has been made general contractor and manager of Dream City. Plans have been drawn and partially approved, the only change in the plans now probably being an elaboration and the addition of other attractions. Buildings on the site at present will be torn down beginning within two weeks, and then the new foundations will be laid. The first building to be erected will be the hotel, which will be a great attraction for the summer season.

DELEGATES SEE SUNDAY SCHOOL EXHIBIT TODAY
There was opened at Gilbert Hall, Tremont Temple, today, as part of the convention of the Religious Education Association, the Sunday school exhibit. It is composed of exhibits by church leaders, who have looked at it with interest, as one of the most complete and comprehensive displays yet arranged illustrating the work of the churches.

MANUAL TRAINING SUCCESSFUL
Rev. Dr. Hodge is the first to apply manual training methods to the study of school, and his work has met with the highest success. He has found that the teaching of manual training subjects by means of geographical maps illustrating legends and made by the pupils themselves, has a great value in teaching the subjects of geography and history.

INSURANCE MAN DIES
FALL RIVER, Feb. 12.—John P. Quinn, one of the best known residents of Fall River, died at his home on Monday afternoon, Feb. 12, at the age of 72 years. He was a native of Ireland and had lived in Fall River for many years. He was a member of the St. Patrick's Catholic Church and was a very active member of the community.

LONGY CLUB PLEASES IN CHAMBER MUSIC

By Kent Perkins.
One of the most interesting and delightful of the many chamber music series under the direction of H. H. Tucker was the seventh one, given yesterday afternoon in Chickering Hall by the Longy Club. The program was very varied and well chosen to give scope to the talented artists of this organization to display their high skill with wind instruments.

The program included Beethoven's "Piano Concerto," Schubert's "Piano Concerto," and a variety of other chamber music pieces. The performance was highly praised for its quality and variety.

In THE Boston American

Alice in Congressland

80 ANT 82 SUMMER ST., BOSTON, FEBRUARY 13, 1905.

He Hit His Man Always in the Same Place. You Can Win That Way

Gradually the blows delivered IN THE SAME PLACE began to tell. The end of the fight was very unpleasant, as described by those who witnessed it. The Australian was hitting his opponent just over the kidneys. No great result was produced by the first, second, third or tenth blow. The American laughed at such a funny way of fighting, at first. But after a while it was very different. The American fighter was leaning heavily to one side, and in the end he was vanquished because he could no longer stand the REPEATED blows in that particular spot. The agony had become too intense.

The man who scatters his efforts or his blows, hitting first here, then there, then somewhere else, **MAY ACCIDENTALLY SUCCEED.** He may score what fighters call a "knock-out" by a lucky chance. But success is more apt to come by devoting his energies to one single spot—after selecting it carefully.

If you saw a man beginning to dig his tunnel at one spot, dig a hole ten feet deep, then move to another spot, dig ten feet more, then move to another spot and keep that up indefinitely, you would laugh at him. You would say, "Crazy tunnel-digger, you will never get a tunnel through that mountain unless you select one place and keep digging at it until you get the hole all the way through."

Hit all your blows in the same place.
